

Feature Number: 4

Feature Name: User Interface

Programmer: Collin Hughes

Tester: Peter Giovi

Test Status: Incomplete

- Element Testing
 - Buttons
 - Click on the Button in the test suite and see if it interacts properly. This test will pass if the button successfully triggers its event.
 - Textbox
 - If text is displaying to the screen properly then this test passes.
 - Images
 - If the Texture loads correctly on the screen then this test passes.
 - Sliders
 - If the slider alters its variable in both directions correctly then this test passes.
 - Radio Button
 - If a radio button is selected, the others attached to it will deselect if they were selected, the others will remain unaltered if there are more than 2. This behavior will result in a pass.
 - List Boxes
 - If the list button is clicked the list opens and all buttons are visible will result in a pass
 - All the buttons inside the list should also go through the Buttons test listed above and pass.
 - Check Boxes
 - Check to see if the boolean value of these buttons works as intended. This will result in a pass.
 - Input Textbox
 - Check to see that the box will interact and provide feedback when a user interacts with it by typing on the screen. This behavior will result in a pass.
 - Panel
 - Check to see if the panel displays properly for a pass.
